## GRAFFITI REMOVER (AG3)

### Product information

#### DESCRIPTION

A specially formulated blend of solvents and bio-degradable detergents available in liquid or gel form. AG3 Gel is designed for more porous or extensively vandalized surfaces where a longer 'dwell time' is required.

#### USAGE/PUPOSE

Designed to remove graffiti from the surface of Anti-graffiti Glaze AG1 and other protective coatings.

#### AG3 is also effective:

- On most surfaces (excluding plastic), not previously protected with an anti-graffiti system (effectiveness will depend upon the porosity and texture of the surface).
- On non-porous surfaces with a heavy build-up of graffiti such as tiles and metalwork

#### CHARACTERISTICS

- Easy to apply, no mixing required
- AG3 does not contain Methylene Chloride. It is therefore user and environmentally friendly, whilst retaining the effectiveness of traditional liquid or gel graffiti removers

#### PERFORMANCE

##### AG3

- Highly effective on a wide range of surfaces

##### AG3 Gel

- Will effectively remove aerosol graffiti, permanent marker pen and lipstick from more porous surfaces such as brickwork and concrete
- Extended dwell time allows effective penetration of porous surfaces and restricts evaporation of solvents which cause unpleasant odours

#### ENVIRONMENTAL CONSIDERATIONS

Contains no Methylene Chloride.

#### PACKAGING

##### Can size

AG3 Liquid: 5 litres, 500ml trigger spray

AG3 Gel: 5 litres

#### AVAILABILITY

Available from RHINOCEROS Limited.

Tel: 0208 444 6165.

### Technical specification

#### COMPOSITION

A specially formulated blend of solvents and detergents.

#### PROPERTIES

**VOC content:** Very High, greater than 50%

##### Flashpoint:

AG3 Liquid: -4°C (Highly Flammable)

AG3 Gel: >55°C

### Application

#### METHOD

##### AG3 Liquid

Use cloth soaked in AG3 Liquid. Wear gloves to protect hands from solvent splashes.

On large and/or textured surfaces, or for graffiti which has been on the surface for a long period, use of a scrubbing brush is recommended for speed.

##### AG3 Gel

1. Apply liberally to the affected area using a bristle brush
2. Lightly scrub major contamination with a soft bristled brush or similar
3. Remove after 3-4 minutes by thoroughly washing down the area: a) preferably with hot water under pressure; b) manually by rinsing and scrubbing with clean water

If further applications required, dry the area before re-applying

### COVERAGE

Dependent upon the nature and porosity of the substrate, and age/nature of graffiti.

### DRYING TIME

Dependent upon weather conditions and temperature. Average times are:

**Working time:** 30 minutes approx.

**Touch dry:** 8 hours

**Hard dry:** 24 to 48 hours

**Full cure:** 1 week

### LIMITATIONS

Not suitable for use on plastic

### Health and safety notes

Detailed information and guidance is provided in Product Safety Data Sheet AG3. The following represents important selected information only.

**Warning:** the liquid is FLAMMABLE. Flash Point – 4°C. The gel has a flash point of >55°C

- Ensure good ventilation during application and drying
- Wear gloves and protective clothing
- Avoid contact with eyes and skin

#### In case of contact with eyes:

Rinse immediately with plenty of water and seek medical advice.

#### In case of contact with skin:

Wash immediately with plenty of soap water or a proprietary skin cleanser. DO NOT USE SOLVENT OR THINNERS/WHITE SPIRIT

- Exclude sources of ignition during application and drying
- No smoking

KEEP OUT OF REACH OF CHILDREN

### STORAGE

Store in secure, dry, ventilated conditions away from direct sunlight and sources of heat. Protect from frost. Containers should be kept closed during storage. Avoid spillage and contamination. Do not empty into drains and water courses.

### SHELF LIFE

12 months in original, unopened container if stored in accordance with recommendations above.
